

**Molding equipment Specification**

**DA-JQ-0002**

## 【Features】

- Maximum rated power: 2000w;
- Maximum exhaust pressure: 0.8Mpa.

## 【Specification Information】

Description	Accessories picture	Order model	Input voltage (ACV)	Net weight (kg)	Overall size (mm)	Applicable product
Thermal molding machine		DA-JQ-0002	220	34.5	450*380*790	Full range of neon strips, EP/ENP Molded Plugs

## 【Precautions】

- Please install it on a stable and firm work surface and keep it away from combustible materials, otherwise it may cause a fire.
- Do not loosen the fixing bolts of the equipment components.
- Equipment needs to be connected to a power and gas source.
- Can not put the equipment in the electric dust, corrosive gases, salt spray, oil, vibration of the place.
- This equipment is a 3-phase 220V power supply, the selection of plug current of not less than 10A.
