

Injection machine Specification

DA-JQ-0004

【Features】

- Injection speed: 1-3g/s,tunable;
- Injection precision: quantity of glue: ±2%-5%,proportions:±2%-5%;
- Input air pressure range: 0.5-0.7MPa;
- Operating method: automation,manually operated;
- Barrel capacity: 2.6L;
- Appearance dimension: L950mm*W980*H1620mm.
- Total weight: 280kg
- Rated power: AC220V 50Hz 3.0KW

【Specification information】

Description	Accessories picture	Order model	Input voltage (ACV)	Net weight (kg)	Overall size (mm)	Applicable product
injection machine		DA-JQ-0004	220	280	950*980*1620	Full range of neon strips, ENP hydraulic Plugs

【Precautions】

- Review the operating instructions carefully before activating the machine.
- When the equipment is running, the operator needs to keep a safe distance from the equipment to avoid personal injury.
- Please install it on a stable and firm working surface, and do not loosen the fixing bolts of the equipment components at will.
- Can not put the equipment in the electric dust, corrosive gases, salt spray, oil, vibration of the place.
